Scarcity of water in Government quarters at Sriniwas Puri, New Delhi

1712. MAULANA OBAIDULLAH KHAN AZMI: Will the Minister of URBAN DEVELOPMENT be pleased to state:

(a) whether it is a fact that the allottees of Government Quarters at Srinivas Puri, New Delhi are not getting water on the first floor;

(b) if so, what are the reasons therefor; and what are the detailed facts in this regard;

(c) whether it is a fact that an overhead tank has been erected there for horticultural purposes and not for supplying the drinking water to the residents;

(d) if so, the reasons therefor; and

(e) what steps have been taken/ being taken to ensure that first floor residents also get water in their quarters?

THE MINISTER OF STATE IN THE MINISTRY OF URBAN DEVELOPMENT (SHRI P. K. THUNGON): (a) Srinivas Puri Government quarters are double-storeyed constructions. The first floor residents are getting water, except in a few located at higher elevation and tail end of the distribution system which do not get water specially in the summer season. However, the water does not reach the Overhead service tanks placed on the roof top of these quarters.

(b) Due to overall shortage of water and inadequate pressure in South Delhi.

(c) Yes, Sir.

(d) The tank being low in height and small in capacity, cannot feed the quarters with drinking water.

(e) After commissioning of 2nd phase of 100 MGD Water Treatment Plant, Haiderpur, the water supply position in South Delhi is likely to improve.
